

CLAIMS

*bx 910* 1. A guidance system for use with a vehicle-mounted line stiper, said guidance system comprising:

2. a frame member for mounting on said vehicle;

3. a first guide arm pivotably attached to said frame;

4. a second guide arm pivotably attached to said frame and said first guide arm;

5. a ground-contacting guide wheel rotatably mounted to said first guide arm; and

6. a guide rod extending vertically upwardly from said second guide arm so that the operator of said vehicle may maintain said guide rod on a line to be striped so as to maintain proper placement of said line through curves.
